

GABRIEL BATAVIA XAVERIUS

INFORMATICS ENGINEERING STUDENT | AI, COMPUTER VISION, AND APPLIED MACHINE LEARNING

Phone: 0851-5767-7512 | Email: gabrielbatavia7@gmail.com

Undergraduate Informatics Engineering student at State Polytechnic of Malang with strong interests in artificial intelligence, computer vision, large language models, and applied machine learning systems. Experienced in developing AI-based solutions through internships, national competitions, robotics projects, and collaborative research. Skilled in building practical AI applications for education, accessibility, industrial operations, and social impact. Currently seeking internship, scholarship, and research opportunities to further develop technical expertise in real-world AI systems.

EDUCATION

Aug 2023 – Present

State Polytechnic of Malang

Informatics Engineering
August 2023 – Present
GPA: 3.71 / 4.00

WORK EXPERIENCES

Computer Vision Engineer Intern
PT Petrokimia Gresik

- Januari 2026 - Present
- Contributed to the development of an internal company web system, enhancing operational efficiency and streamlining processes for 8 team members.
 - Collaborate with the research team to develop computer vision models tailored to industrial and business requirements.
 - Contributed to the design, testing, and enhancement of AI-based solutions for real-world company use cases, resulting in 3 successful project implementations.
 - Support system development by combining web technologies, AI models, and data-driven analysis.

AI Engineer
CV LetConnect Canada
April 2025 – Present

- Designed LLM architecture and inference pipelines for integration into mobile and web applications.
- Supported the deployment of AI-powered features for applications launched on the Apple App Store and Google Play Store.
- Presented AI demos, product use cases, and technical concepts to clients and foundation partners.
- Contributed to securing collaborations with three foundation partners through AI product demonstrations

Head of Image Processing Division
Polinema Robotics | AROC_PL

- Nov 2024 – Present
- Lead a team of eight members in the Image Processing Division for humanoid robot development.
 - Develop real-time computer vision pipelines for robots competing in the Indonesian Humanoid Soccer Robot Contest.
 - Improved object detection and image processing accuracy by up to 70% through pipeline optimization.
 - Designed decision-making logic that improved robot performance and increased competition readiness.
 - Mentor team members in computer vision, robotics software, and applied AI implementation.

AWARDS AND ACHIEVEMENTS

Second Runner-Up

AI Innovation Challenge, COMPFEST 16 – Faculty of Computer Science, Universitas Indonesia

October 2024

- Developed an LLM-powered educational system to help Indonesian college students understand industry needs and career preparation.

Audience Favorite

AI Innovation Challenge, COMPFEST 16 – Faculty of Computer Science, Universitas Indonesia

October 2024

- Received recognition from the audience for an innovative AI-based education solution.

Second Place

Electro Weeks National Competition – State Polytechnic of Malang

October 2025

- Built an IoT-based system to detect and prevent fire risks in peatland areas.

Best Innovation Award Winner

Hackathon Compsphere – President University

October 2025

- Created an AI-powered game prototype for PT Kereta Api Indonesia.
- Recognized for creativity, innovation, and technical execution among competing teams.

Second Place, Innovation Creation Category

KMIPN – Politeknik Negeri Padang

October 2025

- Built LLMForAutism, an LLM-based solution developed with Malang Autism Center to support children with verbal autism.

Finalist

UI/UX Competition 2024 – YOTers Indonesia

- Selected as a finalist in a UI/UX competition focused on digital product design and user experience.

PORTOFOLIO HIGHLIGHT

LLMForAutism

Collaboration with Malang Autism Center

- Developed a specialized LLM-based system to support children with verbal autism.
- The product is planned for official launch and intellectual property registration by Malang Autism Center.

Sign Language Application

Academic Project

- Developed a sign language application to support communication for deaf users.
- Built in collaboration with lecturers and community partners.

IoT System for Forest Fire Prevention

Academic Project

- Created an IoT-based monitoring system for early detection and prevention of peatland fires.
- Integrated sensors and monitoring logic to identify potential fire risks.

CERTIFICATIONS

Microsoft Certified: Azure AI Engineer Associate

- Certified in developing, managing, and deploying AI solutions using Microsoft Azure.

Microsoft Azure AI-102

- Trained in designing and implementing AI solutions using Azure Cognitive Services, machine learning, and cloud-based AI tools.

AWS re/Start 2025

- Completed training in cloud computing fundamentals, AWS services, cloud operations, and infrastructure management.

TOEIC English Certification

- Completed TOEIC Test and get Score 820

TEACHING AND ACADEMIC ACTIVITIES

Workshop Assistant

NVIDIA Workshop

- Assisted participants in understanding AI-related workshop materials and technical exercises.

National Webinar Speaker

“AI for Mental Health Awareness Among Youth” – WCC Dian Mutiara Parahita

- Delivered a national webinar session discussing the role of AI in supporting mental health awareness among young people.

Seminar Speaker

“AI for Productivity” – Workshop & Riset Informatika

- Presented practical AI tools and workflows to help students improve productivity and learning efficiency.

Mentor

Workshop & Riset Informatika

- Mentored Informatics students in understanding technology, programming, UI/UX basics, and AI-related topics.
- Guided students in learning Figma and developing digital product design skills.

ORGANIZATION

IT Staff

KSPM Polinema – Capital Market Study Group

- Supported the organization by creating and managing digital content.
- Assisted with IT-related needs for organizational activities and digital communication.
